Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1400

Attention: Mr. Charlie C. Agwumezie, Art Unit 3621

Re: Re-write of patent application 10/082,723, "System for inexpensively Executing Online Purchases"

Dear Mr. Agwumezie:

As per your correspondence on the subject patent (attached), the USPTO rejected the first four claims and objected to the remaining Claim #5 because of dependency on the four rejected claims. On October 21, 2004, I replied by fax to the USPTO correspondence with a proposed rewrite of the claims. Subsequently you confirmed by phone that the rewrite was acceptable. Accordingly, I am hereby resubmitting two copies of the subject patent application that has been modified to eliminate Claims 1 through 4 and make Claim #5 independent of rejected claims. There is only one claim in the modified patent application.

Sincerely,

Thomas Calvin Cannon

men Calvin Cours

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1. Claim 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Randle et al. U.S. Patent 6,594,647 in view of Lawlor et al U.S. Patent 6,202,064.

As per Claim 1, Randle et al discloses a system for online transactions comprising: a customer interface device for connecting buyers to either a voice or data network (col. 13 line 5+, col. 10 line 25), a network of banks (col. 11, line 30), a collection of buyers each of which maintains a buyer account with at least one of the banks in the network of banks (col. 12, line 10+), a collection of payees each of which maintains a payee account with at least one of the banks in the network of banks (col. 10, line 10+).

Randle further discloses a centralized agent (See Fig. 1 ECTS) that directs the transfer of funds from a buyer account into a payee account, however, Randle et al does not explicitly disclose an agent that directs the transfer of funds from the buyer account into a holding account residing in the same bank as the buyer account within the network of banks and also directs the transfer of funds into payee account from holding account residing in the same bank as the payee account within the network of

Art Unit: 3621

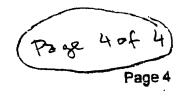

٠,

banks. Randle further failed to disclose a network of holding accounts with at least one holding account residing in each of the banks in the network of banks.

Lawlor et al discloses a system for making online payments comprising a network of participating banks and teach a network of holding accounts (see col. 46, line 65+) with at least one holding account residing in each of the banks in the network of banks. Lawlor et al further discloses an agent that directs the transfer of funds from a the buyer/user account into holding accounts residing in the same bank as the buyer/user account within the network of banks, and also direct the transfer of funds into a payee account from a holding account residing in the same bank as the payee account within the network of banks. Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the method of Randle et al and incorporate holding accounts of Lawlor et al to achieve cost effective and easier funds transfer.

- 3. As per claim 2, Randle et al further discloses a means for authenticating buyers and payees and enforcing security (see col. 3 line 45, col. 4 line 25+ and line 50+)
- 4. Regarding claim 3, Randle further discloses a process for settling imbalances between the various holding accounts. (See fig.7, col. 3, line 65+)
- 4. As per claim 4, Randle further discloses a means for delivering transaction logs to payees who maintain accounts within the network of banks (see col. 3, line 65+, col.12, line 60).

Allowable Subject Matter

Application/Control Number: 10/082,723

Art Unit: 3621

Claim 5 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference cited to Munoz, U.S. Application Publication No. 2002/0052853 A1 is considered relevant to the claimed invention:

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles C. Agwumezie whose number is (703) 305-0586. The examiner can normally be reached on Monday - Friday 8:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (703) 305 - 9768. The fax phone number for the organization where the application or proceeding is assigned is (703) 305-7687.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
